

Remote Apps – using “Explorer” to get to my files

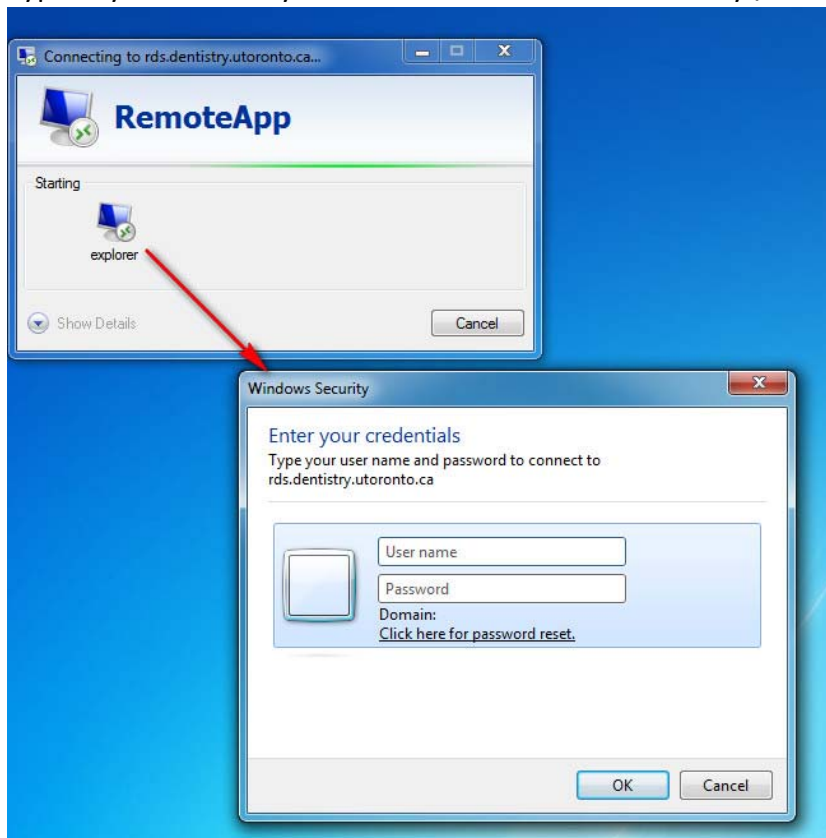

1. Make a Remote connection as you would normally
2. You will see a new icon called “explorer”, click on this:

3. If you have a MAC a new window will open and connect you automatically. If you have a PC a file will be downloaded. If you are using Chrome, or example, it will look like this:

4. Click on this file which contains the connection information. The following will show up. Type in your Dentistry user name in this format: Denistry\username and click ok:

5. You will now see the "Explorer" open up with your "Home Directory" that has your personal files and the "Student Resources" folder. You can access these files as you would from any Dentistry computer:
