

Communicator 7 – Change Passcode for Logon

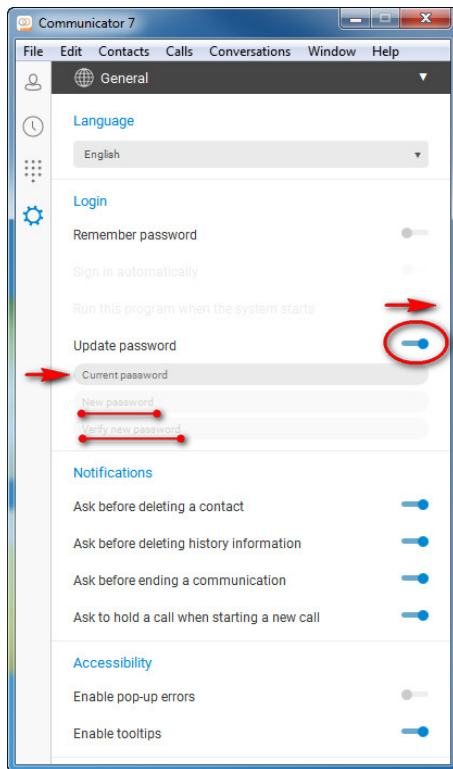

1. Launch the Communicator application as normal by locating the icon on your desktop and double click it.

2. You must know your present passcode (Password) in order to change it to a new version. Once logged in, go to settings area, circled below. Choose the General area.
3. You will go to the “Update password” setting shown here:

- From here you will move the toggle to the right. This will open up the option to change your password as shown below:

- Enter your current password
- Enter your NEW password in the next line
- Re-enter your NEW password in the next line
- Sign out of Communicator 7 to update our New password
